

# Where Luxury Meets Function

# Architectural Elegance

Change your perception of what a home elevator can be. The Signature Crystal Series elevator takes the elevator out of the dark and into the light as the focal point of your home. The Crystal Series is a stand-alone solution that does not require a hoist-way to be constructed. The Crystal Series elevator ascends elegantly within existing architecture, making it an ideal choice for renovations and allowing it to inspire the design of your new residence. In any scenario, the Crystal Series is an elegant way to achieve peace of mind without compromising style while your investment in beauty and convenience today also ensures mobility and independence for the future.

## Panoramic Views

Enjoy sweeping 360-degree views from your Signature Crystal Series elevators, which can be crafted from either clear acrylic or low iron silica glass for uncompromised clarity. The effect is a spacious feeling cab that provides a comfortable, airy ride with spectacular vistas. Metal components are finished with lustrous powder-coat in virtually any color you can imagine to either blend with your home's décor or provide dramatic contrast. Much more than a home elevator, the Crystal Series elevator transcends convenience to deliver a ride that is an experience in itself.

# State of the Art Design

Your Signature Crystal Series elevator is designed and constructed with care using reliable components to meet or exceed the strictest safety guidelines. Driven by an energy-efficient winding drum drive train system using two aircraft cables for a smooth ride, this elevator requires minimal maintenance to provide you with dependable performance for years to come. A masterpiece of art and engineering, the Crystal Series elevator offers function and beauty for those with the most discerning taste.

## The Finest Materials

Quality is second to none when you choose a Signature Crystal Series elevator. We use only premium clear acrylic panels, which far exceed code requirements for strength and will not discolor over time. Glass Crystal Series models are crafted from crystal clear low-iron silica glass for ultimate clarity without a green hue. The result is a curator-pleasing aesthetic that earns pride of place in even the most distinguished homes.

## Install with Ease

Simplicity in design means a simple installation. The Signature Crystal Series elevator can be quickly installed with no mess and no fuss. Components fit easily through standard door openings, down narrow hallways, and up stairwells with no special lifting equipment required. This makes Crystal Series elevator an ideal choice to retrofit an existing home or install in a luxury penthouse. While a four-inch pit is recommended, this elevator can be installed without a pit. Also, it can be installed with a small ramp or short step into the elevator at the lower level and it can be configured for travel up to four stops.

Signature Crystal Series

# Round Acrylic Elevator
